## MOBILITY SOLUTIONS

### **Fastest Wins**

Efficient, Streamlined, Immediate. Today, it's all about efficient execution. Mobile applications are at the heart of the efficiency by allowing organizations to integrate users that don't work from a desk.

### **Have It Your Way**

At Clients First, we've developed custom mobile applications that integrate with Microsoft's Dynamics AX. Our mobile applications are designed to work both online and offline. We've designed these applications to accommodate the devices of your choosing with the look and feel you desire. Our applications help you get the job done while showcasing your business as well.

With mobile applications, expectations for look and feel escalate far beyond the traditional ERP system. Clients First has an expert team to help design the best application for your targeted use. We couple deep technical skills with an understanding of what the user needs to efficiently get their job done.

PUTTING CLIENTS AND THEIR BUSINESS FIRST

### Secure and Simple

Enter data once into Dynamics AX and then share it with your mobile users. You'll be able control access, enable devices and manage security all from within the standard AX system. If a device is lost, your data will expire as per the rules you define for offline use. If desired, you can configure no offline use to equal no access.

### Within Reach

The applications are designed to be sold through the Apple, Google and Microsoft stores. You can simply direct your customers and employees to go to the app store of their choosing to get started with their application.

Some ways in which companies have experienced the benefits in enterprise mobility are:

- › Catalogs
- › Mobile Applications for Sales Teams
- › Field Service Management
- › Dispatching and Scheduling
- › Barcode, SKU and RFID
- › Timesheets
- › Shop Floor Management
- › End User Data Entry On-The-Go
