

Clients First successfully provides, supports and implements leading Enterprise Resource Planning solutions by putting clients and their business first. By helping organizations leverage the power of an ERP solution, clients are able to gain visibility and insight, optimize their operations and rely on dedicated support. With vertical expertise in Manufacturing, MRO, Distribution and Food & Beverage industries, Clients First has been the trusted advisor for many businesses looking to drive revenue growth and improve productivity with a partner they can rely on.

BUSINESS FIRST

PUTTING CLIENTS AND THEIR BUSINESS FIRST

Clients First NAV

The Clients First NAV practice is devoted to delivering the power of an ERP solution, Microsoft Dynamics NAV, to supply chain organizations. Encompassing six of Clients First's eight offices across the continental United States, Clients First's NAV practice has consultants in Alabama, Florida, Illinois, New Jersey, Tennessee and Texas. We pride ourselves in our ability to successfully harness basic Dynamics NAV functionality, paired with the proper consulting and support elements, to meet our client's unique business needs. Our experienced team of individuals, combined with a significant number of years in industry knowledge, enables us to help clients leverage the power of an ERP Financial/Supply solution and gain a competitive advantage in their respective industries.

Why Clients First NAV

- › Experience since first introduced in the US
- › Extensive online video training library
- › www.dynamics-nav-training.com
- › Consultants across the U.S.

“ Clients First was very effective in understanding how our business operated and more importantly, how the Navision tool would be leveraged against our business to help us be more effective and satisfy rapid growth. ”

-Bill Schineller, Twinings North America

PUTTING CLIENTS AND THEIR BUSINESS FIRST

Upgrading Dynamics NAV

Upgrades are easier said than done. At Clients First, we've made reviewing the upgrade process easy. In considering an upgrade, you'll want to make sure that client workstations meet minimum requirements of the new software version. Additionally, you'll want to verify that your servers have enough resources to support the new version as well as enough disk space to manage and execute a conversion. We've broken the upgrade process into two major areas - Conversion & Training. Conversion will help your team determine the data and customizations important for migrating over to the new version. Training will be a key step in boosting user adoptability and educating your team. Contact one of our five offices below to discuss your Dynamics NAV upgrade.
